Great Hall Project Reveals Public Dashboard

DEN keeping its promise of transparency as the project moves forward

DENVER – July 7, 2020 – Today, Denver International Airport (DEN) unveiled a new public-facing dashboard for Phase I of the Great Hall Project. The dashboard provides transparency into the status, progress and budget of the project.

“When DEN regained control of the project late last year, we made a commitment to focus on the transparency of the project through a project dashboard that is accessible through our website,” said DEN CEO Kim Day. “With significant work now underway on phase I of the project, we are excited to launch the dashboard and share our progress with the community.”

This dashboard focuses on five main categories for Phase I of the project only and displays each goal, the current status and whether DEN and its contractor are meeting the goals and milestones set for the project. The five categories include:

- The overall schedule and key milestones:
 - Ticket Pod Steel Completion: All the structural steel for ticketing pods are delivered, installed and completed
 - Central Monitoring Facility: The new area where TSA resolves checked baggage screening is completed
 - Ticket Pod Completion: The new ticketing pods are complete and ready for airline use
 - Commissioning: Verifying that the building’s systems operate as intended
 - Substantial Completion: The majority of the scope of Phase I work is complete and the space can be occupied by the airlines
- Construction cost
- MWBE (Minority/Women-owned Business Enterprises) participation
- Workforce program
- Safety performance

The dashboard is available on the [Great Hall website](#) and metrics will be updated monthly.

Phase I of the Great Hall Project restarted construction in March 2020 with new general contractors Hensel Phelps and is scheduled to be complete by the end of 2021.

Denver International Airport is the fifth-busiest airport in the United States. With more than 69 million passengers traveling through the airport each year, DEN is one of the busiest airline hubs in the world’s largest aviation market. DEN is the primary economic engine for the state of Colorado, generating more than \$33 billion for the region annually.
