Amazed by free 200Mbps WiFi at [@DENAirport](#). Even sufficient bandwidth to clone Riak

Props to [@DENAirport](#) for having excellent wifi - 100MB speed - & no login or splash page. Makes delayed flights way more bearable.

S/O to Denver **airport** for having the fastest unlimited **Wi-Fi** I've ever seen. I knew Colorado was cooler than the rest of us.

How is it possible that Denver's airport has the best wifi of any airport in the American West. Silicon Valley could learn a thing or two from Denver in the wifi department.
