

Denver International Airport

Noise Abatement Office Annual Report – 2000

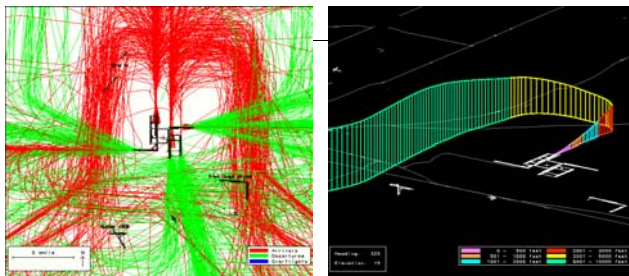

Includes 2000 Quarterly Breakdown

Please Note: Does not include the impact of extraordinary weather to the NEPS Values.

Introduction

This report is published by the DIA Noise Abatement Office as part of DIA's commitment to minimize noise impacts in the airport environs. Although the Federal Aviation Administration (FAA) is the sole authority for the control of aircraft, the City and County of Denver, as airport proprietor, has taken the lead responsibility for monitoring and addressing DIA aircraft noise issues in the vicinity of the airport.

The focus of this report is on the data collected by DIA's Airport Noise and Operations Monitoring System (ANOMS) throughout 2000. In addition to annual data, a breakdown by quarter is also provided. Information contained in this publication includes Noise Exposure Performance Standards (NEPS) values, maps depicting DIA's 65 Ldn noise contour, as well as aircraft operations statistics, and runway use percentages. For a complete description of DIA's ANOMS system see page 3.

Examples of ANOMS System Output

Aircraft flying over an RMT

FAA Airport Surveillance Radar

- *The Noise Contours and NEPS values were established pursuant to DIA operating with 6 runways. Currently DIA has only 5 operating runways, therefore the reported data may be inconsistent with established numeric sound levels for the Noise Contour and NEPS locations.*

Contents

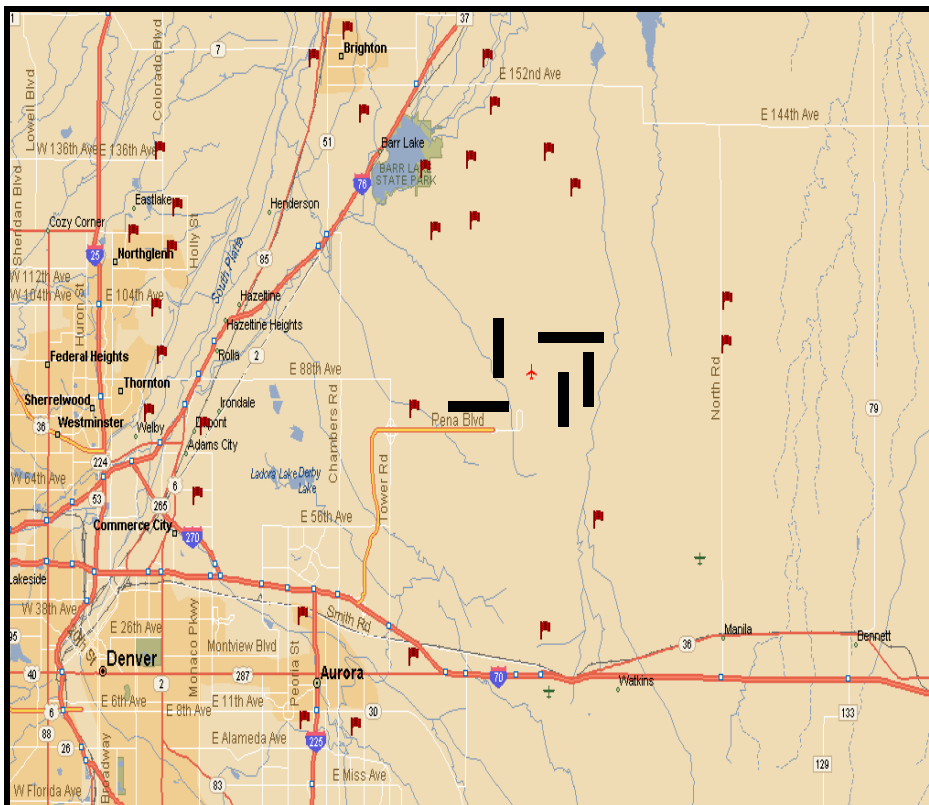

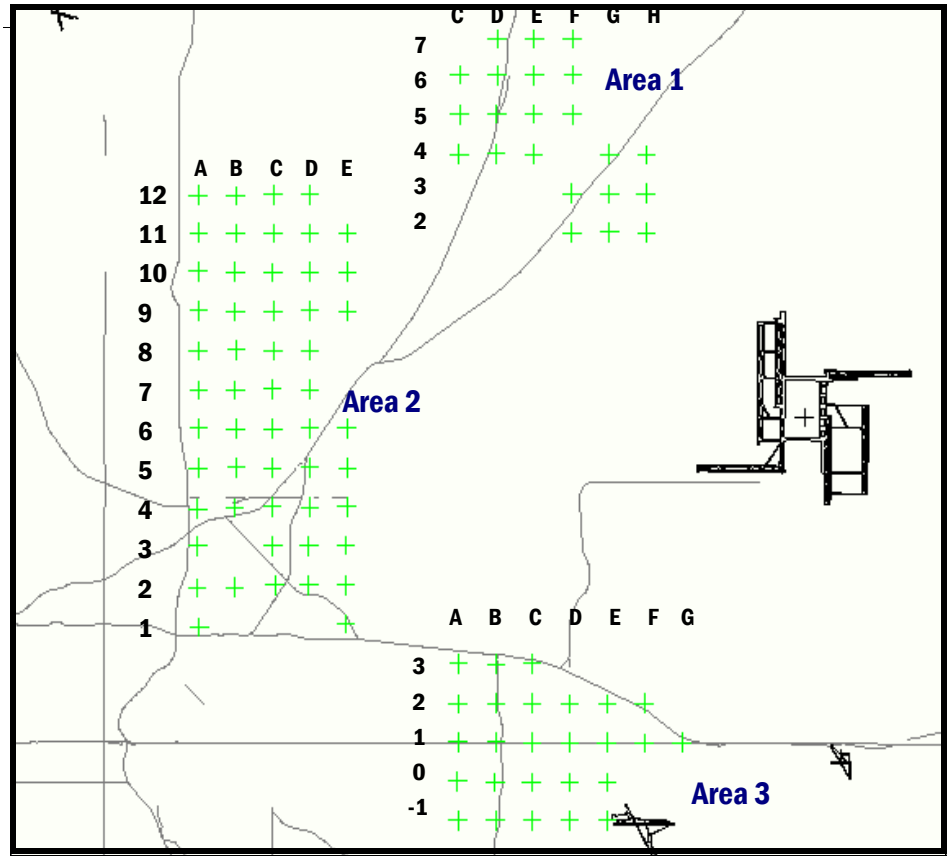

Introduction	1
NEPS Points and RMT Maps	2
DIA ANOMS System	3
2000 Annual Data	4
First Quarter 2000 Data	9
Second Quarter 2000 Data	13
Third Quarter 2000 Data	17
Fourth Quarter 2000 Data	21

Definitions

- **Contour** – A line enclosing a certain area in which the annual Ldn is at or above a certain level.
- **dB** – Decibel. A Linear scale used to define a logarithmic scale of sound amplification.
- **Ldn** – A 24 hour Leq with a 10 dB penalty added to all levels measured between 10pm and 7am.
- **Leq** – Equivalent continuous sound level (average level over a given time span)
- **NEPS** – Noise Exposure Performance Standards. A group of geographic points surrounding DIA, for which corresponding annual aircraft Leq limits have been set in the IGA. There are 101 grid points in Adams County defined in the IGA. (See map page 2)
- **Area 1:** Brighton and Barr Lake
- **Area 2:** Thornton, Northglenn and Commerce City
- **Area 3:** Aurora

Please Note: Does not include the impact of extraordinary weather to the NEPS Values.

Noise Exposure Performance Standards (NEPS) Grid Coordinates

Remote Monitoring Terminal (RMT) Locations

DIA – Airport Noise and Operations Monitoring System

The Denver International Airport – Airport Noise and Operations Monitoring System (AMOMS) is a state-of-the-art computer system designed to enable the City and County of Denver to monitor aircraft noise in the vicinity of the airport. In addition to monitoring noise levels, the system calculates Noise Exposure performance Standards (NEPS) at 101 grid points in Adams County (see map page 2).

The DIA ANOMS system monitors noise levels at 28 permanent and 4 portable noise monitoring terminals. These terminals are located throughout the metro Denver area.

The system also records the movement of all aircraft in the vicinity of DIA by utilizing FAA air traffic control radar data. This makes it possible to match actual flights with noise events. In addition the ANOMS system records weather info from three remote stations and includes a RACAL recording device to record pilot/controller radio transmissions.

DIA Noise Hotline Policy

The purpose of the DIA noise hotline is to provide an opportunity for individuals to express their concerns regarding noise generated by aircraft operating at DIA. The noise complaint system has been designed to ask questions relative to citizens' concerns. Once this information has been correctly entered, it is then transcribed into the Airport Noise and Operations Monitoring System (ANOMS), where specific complaints can be matched to individual flight tracks. It is essential for all information to be entered correctly in order for the system to be effective.

Profanity will not be tolerated and will result in the complaint not being registered.

Any attempt to deliberately tie-up or abuse the hotline can be considered harassment and may result in police action. Phone harassment is a state offense and can carry a jail sentence and/or fines. ***Threats involving aircraft and/or the airport are a very serious matter and are a federal offense. All threats will result in Denver Police Department notification and may involve an FBI investigation.***

Please note that the noise hotline is an automated system, and that weak or noisy telephone lines in a caller's local area may in some rare cases cause the system to disconnect or malfunction. We have therefore created two alternate methods which may be used to register a complaint. Complaints may be faxed to (303) 342-2366, or E-mailed to Noise.Office@diadenver.net.
